To whom it may concern,

In periods 1, 2 and 3 of the 3rd-year of the bachelor Psychology at Maastricht University, students have to obtain a total of 24 European credits (ECTS) for their elective programme. They can either choose a minor at another UM faculty or at another Dutch university, or they can take electives within or outside the faculty.

One of the options is, that students take the 'Clinical Psychology' Elective Package within the faculty, which consists of two theoretical courses and two short clinical internships. Students will have to organise their internships themselves. They will have to find two different, consecutive internship spots and respective supervisors, which by completion fulfills the necessary requirements.

Passing the 'Clinical Psychology' Elective Package results in 25 ECTS.

The ECTS credits obtained for the electives are mandatory ECTS to complete the bachelor programme, which requires 180 ECTS in total.

During the clinical internships within the Clinical Psychology Elective Package, the student will be enrolled as a full time bachelor student at Maastricht University.

We hereby certify that _____ is planning to sign up for the Clinical Psychology Elective Package for academic year _____.

On behalf of the Board of Examiners FPN,

Dr. Fleurie Nievelstein
Chair Bachelor Affairs
